Re: Removal of 10 yards of horse waste - *ywn92-009*

This is in response to the Notice of Violation on August 26, 2013 after your site inspection on August 15, 2013. We had to remove the 10 cubic yards of horse manure from the site. After talking with Keith Larick with the Division of Water Resources, he advised it was acceptable to dispose of the waste by disking into our farm land. He also advised if anyone had any questions to have them call him on the permission to disk into our farm land.

We have disposed of the waste by disking into our farm land and now writing to advise of this disposal so now you can do a follow up visit of our site to confirm of the clean-up.

Thank You,

John Atkins - President of John L Atkins II Grading
